

SystemHandle::setValue

SystemHandle::SystemHandle

SystemImplementation
::setValue

```
graph LR; A[SystemHandle::setValue] --> C[SystemImplementation::setValue]; B[SystemHandle::SystemHandle] --> C;
```

The diagram illustrates two calls to the `SystemImplementation::setValue` method. On the left, two white boxes represent the calling methods: `SystemHandle::setValue` (top) and `SystemHandle::SystemHandle` (bottom). On the right, a gray box represents the target method: `SystemImplementation::setValue`. Two blue arrows point from the white boxes to the gray box, indicating the flow of the calls.
